Smoke & Sanity Testing Detailed Report

Project: HRMS

Document Type: Smoke and Sanity Testing Report

Prepared For: Client Delivery

Prepared By: QA Team

Version: 1.0

Date: 2nd December, 2025

1. Introduction

The Smoke & Sanity Testing for the **HRMS** module was conducted to validate the critical functionalities of the system after deployment or changes. The objective was to ensure that the essential **HR workflows**, such as **employee creation, profile updates, approvals, transfers, increments, promotions, and report generation**, are functioning as expected. The testing focused on end-to-end verification of the HRMS modules, ensuring stability, basic usability, and proper data management.

5. Observations

- No critical errors found during smoke testing.
 - Minor UI alignment issues noted in dashboard widgets (non-blocking).
 - Build ready for further detailed testing (Regression / Functional / Performance).
-

6. Recommendations

- Proceed with full regression and functional testing.
 - Monitor minor UI issues for resolution in next build.
 - Maintain smoke test suite for future builds to ensure quick build validation.
-

7. Conclusion

The Final Assessment of HRMS smoke testing confirms that the system **build is stable**, and all critical HR functionalities are operating as expected. Key workflows across all modules were verified successfully, including employee creation, profile updates, approvals (increment, promotion, transfer), payroll-related operations, and report generation. The system is deemed **ready for detailed** functional, regression, and performance testing, with no showstopper defects identified during smoke **testing**.
